Assistant Professor Tae Won Nam

School of Materials Science and Engineering,
Pusan National University, South Korea

Tae Won Nam received his PhD degree (2020) in Materials Science and Engineering from Korea Advanced Institute of Science and Technology. He then joined the group at Massachusetts Institute of Technology as a post doctoral fellow. After carrying out research for two years in MIT, he recently joined as a faculty member in School of Materials Science and Engineering, Pusan National University.

Nam's research focuses on nanopatterning and nanotransfer-printing of organic and inorganic materials including quantum dots, polymers, and silicon nanowires for advanced opto-electric devices and biosensors
