
Assistant Professor. Hae Yeon Lee

Rice University, USA

Dr. Lee is an assistant professor of Materials Science and NanoEngineering. She received her B.S. in Materials Science and Engineering from Korea Advanced Institute of Science and Technology (KAIST), and Ph.D in Materials Science and Engineering from Massachusetts Institute of Technology (MIT). She received Samsung Scholarship during her Ph.D. Her doctoral research focused on optical and structural characterization of low dimensional materials at nanoscale. After her Ph.D., Dr. Lee served as a Postdoctoral Research Scientist in Columbia Nano Initiative at Columbia University. During this time, she expanded her research area into 2D device fabrication and electrical characterization. In January 2024, Dr. Lee joined the faculty at Rice University, starting her own lab in the Department of Materials Science and NanoEngineering.
