Prof. Jin Woong Kim

Sungkyunkwan University, Republic of Korea

Prof. Jin Woong Kim is currently the Dean of School of Chemical Engineering at Sungkyunkwan University (SKKU), specializing in advanced colloidal materials for biohealthcare applications. His research excellence is evidenced by over 280 peer-reviewed publications and 80 patents, establishing him as a leading authority in colloid science. Prof. Kim's scholarly contributions have earned him prestigious editorial positions at *Langmuir* (2018-present) and *Journal of Industrial and Engineering Chemistry* (2014-2022), reflecting international recognition of his expertise. His leadership extends beyond academia through significant administrative roles, including General Affairs Director of the Korean Society of Industrial and Engineering Chemistry (2022-2023) and Industrial Convergence Ombudsman at the Vice Minister level (2018-2021). In these positions, Professor Kim has effectively bridged fundamental colloid science with industrial applications while addressing regulatory challenges for emerging technologies. His work has established new standards in colloid science, significantly advancing South Korea's competitive position in this field and fostering both scientific progress and industrial innovation.
