Prof. Nitish Govindarajan

NTU Singapore, Singapore

Nitish Govindarajan is an assistant professor in the school of chemistry, chemical engineering and biotechnology at NTU Singapore. His group (DELI Lab) is interested in using atomistic simulations to understand electrocatalytic interfaces for applications in energy conversion. Nitish obtained his PhD as a Shell-NWO fellow from the Van't Hoff Institute at the University of Amsterdam in The Netherlands. He was a postdoctoral researcher at Lawrence Livermore National Laboratory and at the Technical University of Denmark prior to starting his independent career.
